Career Research Reflection

For years I have had the goal of being a veterinarian. In order to achieve that goal, I have been researching the qualities of the job. One way that I have researched this job is through electronic research. I used the site called Bureau of Labor Statistic (www.bls.gov) to research my career. By learning more about the job, I will be more informed and more prepared to enter the work field.

The veterinary field is one that is expected to grow in the next decade. Although this field is expanding, veterinary science is very competitive as many people will enter the field. The veterinarian field is expected to grow 33% from 2008-2018, according to the US government's official statistics on the website www.bls.gov. In addition, demand for farm animal vets will be exceptionally high because rural areas which require vet assistance don't have enough veterinarians in close proximity. For this job, I will need more than six years of education. The very long schooling is due to the fact that students have to learn every animal's body, unlike a doctor who learns just the human body. Choosing the right college is important to get a veterinarian job upon college graduation. My plan is to attend either Cornell or Ohio State which are two schools that are extremely selective in their admissions. To get into a good college
