

Download File PDF Human Evolution Comparing Primates Answer

#Jenny

Finally I get this ebook, thanks for all these I can get now!

#Rio

Cool! I'am really happy

#Markus Jensen

I did not think that this would work, my best friend showed me this website, and it does! I get my most wanted eBook

#Hun Tsu

wtf this great ebook for free?!

#Che Salsa

My friends are so mad that they do not know how I have all the high quality ebook which they do not!

#Diego Butler

so many fake sites. this is the first one which worked! Many thanks

Human Evolution – Comparing Primates

Background

According to the theory of evolution, all species are are related and linked to a common ancestor. Species that are more closely related have common ancestor that existed much more recently, while species that are distantly related may have to go back hundreds of millions of years to find a common ancestor.

The closest living relatives to the Homo sapiens, the human species, are primates. This lab will compare many of the physical and biochemical characteristics between this group of animals.

Comparative Anatomy

Examine the drawings of the hands of five different primates shown below. Fill out the table of observations.
